SECURITY TEST // RESULT: FAILED

Congratulations. You Clicked It.

You were explicitly told **NOT TO CLICK**.

And yet, here you are.

Welcome to the AI era, where downloading a random file can be the beginning of a very bad day.

Not every link is safe. Not every file is what it claims to be. And not every button deserves your click.

> **Think before you click. Verify before you download.**

Oh, and congratulations on failing the first security test.
